I'm a Digital Forensics and Incident Response (DFIR) professional specializing in investigating cyber threats, identifying indicators of compromise, and mitigating the impact of security incidents. With a strong foundation in cybersecurity principles and hands-on experience in forensic analysis and incident response.

Experience

09/2022 - PRESENT

DFIR Specialist – JOCERT Team / National Cyber Security Center

- DFIR Specialist within the JOCERT team, providing 24/7 incident response across public and private sectors and investigating over 30 cybersecurity incidents monthly involving multiple threat vectors and APTs.
- Conducts digital forensics including forensic acquisition and analysis of compromised systems, malware analysis, memory and log forensics, and root cause investigations.
- Collects, preserves, and handles digital evidence in accordance with legal, regulatory, and compliance requirements.
- Utilizes EDR, threat hunting, and forensic tools such as Autopsy, FTK Imager, KAPE, Volatility, Plaso/Log2Timeline, Sysinternals Suite, YARA, and other security tools to detect malicious activity, contain threats, and support system recovery.
- Produces detailed forensic and incident reports, contributes to threat hunting, post-incident reviews, and continuous improvement of incident response procedures.
- Worked closely with SOC teams, threat intelligence, and legal teams to ensure coordinated incident response and strengthen the organization's overall security posture.

09/2021 - 09/2022

SOC / National Cyber Security Center

- Monitored security alerts and events using SIEM tools
- Analyzed potential threats and security incidents to determine impact and severity
- Responded to and escalated security incidents following established procedures
- Conducted initial triage and investigation of alerts to identify false positives and genuine threats
- Documented incidents, findings, and response actions in ticketing systems for audit and reporting purposes

09/2020 - 09/2021

System Administrator / National Cyber Security Center

Provided technical support for Security Operations Center (SOC) infrastructure by configuring and maintaining SIEM connectors to onboard new log sources (e.g., firewalls, endpoints, cloud services), ensuring continuous data flow and platform reliability.

Education

2015 – 2019

Bachelor of Computer Science/Hashemite University, Jordan

Certificates

- CEH
- ICS DFIR (Kaspersky)
- IR (Kaspersky)
- YARA (Kaspersky)
- Digital Forensics (PGI)
- CCNA
- Advanced DFIR (Kaspersky)
- Linux+
- Blue Team Level 2 (BTL2)
- Cortex XDR - Prevention and Deployment (EDU-260)
- Cortex XDR - Investigation and Response (EDU-262)

Skills

- Digital Forensics
 - Disk and memory forensics (Volatility, FTK, EnCase, Autopsy)
 - Forensic imaging and data acquisition (FTK Imager, dd)
- Network forensics
 - Incident triage and containment
 - Root cause analysis
 - Log analysis (Windows Event Logs, Syslog, firewall, DNS, etc.)
- Tools & Platforms
 - SIEM
 - XDR solutions (Cortex, Vision One)
 - Packet analysis (Wireshark, tcpdump)
- Scripting & Automation
 - Python, PowerShell, Bash (Automation and Analysis)
 - Regex (Logs and Pattern matching)
